SUBLIMATION HEAT PRESS MACHINE

5 in 1 Combo Heat Press Machine

A 5-in-1 heat press machine is a versatile piece of equipment used in various printing and heat transfer applications, typically in the context of customizing garments and other items. It's called "5-in-1" because it combines multiple functions into a single machine. These machines are commonly used by businesses, crafters, and individuals looking to create personalized and customized items, Such as Fabric, Metal, Wood, Ceramic, Crystal & Glass. Created your own custom T-Shirts, Mouse Pads and many more items.

Flat Heat Press: This attachment allows you to transfer designs, graphics, or images onto flat surfaces like T-shirts, mousepads, puzzles, and more. It works by applying heat and pressure to a transfer paper or vinyl, adhering it to the surface

Mug Press: The mug press attachment is used to transfer designs onto cylindrical objects like coffee mugs, travel mugs, and sports bottles. It's especially popular for customizing promotional items.

Plate Press: This attachment is designed for transferring designs onto plates. It's often used for creating personalized commemorative or decorative plates.

Cap Press: The cap press attachment is used to apply designs or logos onto baseball caps and hats. It's commonly used in the customization of sports team caps, promotional headwear, and more.

Mug Heat Press Machine

A sublimation mug press machine, is a specialized piece of equipment designed for transferring designs, images, or graphics onto cylindrical mugs and cups. These machines are commonly used in the customization and personalization of drinkware, making them popular among businesses, promotional product creators, and individuals looking to create unique gifts or merchandise.

Power : 450 W

Weight : 11 Kg

Packing : Carton

Bi- voltage : 220/110 V

Temp system : C & F

Measure : 38x36x33 CM

Voltage : 220V / 110V

Price : 3,500 Rs

Label and Logo Heat Press Machine

4"x 4" Label and Logo Heat Press Machine

A 4x4 label and logo heat press machine is a compact and specialized piece of equipment designed for transferring small designs, labels, and logos onto various items. These machines are often used for applications like customizing clothing tags, adding labels to promotional products, and applying logos to small fabric items

Power : 450 W

Weight : 15 Kg

Packing : Foam Packing

Dimension : 4x4 inch

Color : Black

Package Size : 38x38x42 CM

Voltage : 220V/110V

Price : 7,000 Rs

Label and Logo Heat Press Machine

6"x 6" Label and Logo Heat Press Machine

A 6x6 label and logo heat press machine is a compact and specialized piece of equipment designed for transferring small designs, labels, and logos onto various items. These machines are often used for applications like customizing clothing tags, adding labels to promotional products, and applying logos to small fabric items.

Power : 1800 W

Gross Weight : 30Kg

Bio- Voltage : 220/110V

Temp Range 0-420 Fahrenheit, 0-200 celcius

Time Range 0-800 sec

Packing : Carton packing

Dimension : 73x73x42 CM

Price : 7,200 Rs

Label and Logo Heat Press Machine

8"x 8" Label and Logo Heat Press Machine

A 8x8 label and logo heat press machine is a compact and specialized piece of equipment designed for transferring small designs, labels, and logos onto various items. These machines are often used for applications like customizing clothing tags, adding labels to promotional products, and applying logos to small fabric items.

Power : 450 W

Weight : 15Kg

Bio- Voltage : 220/110V

Badge Making Machine

A button badge making machine is a device used to create button badges, also known as pinback buttons or button pins. These machines are commonly used for various purposes, including promotional events, political campaigns, fundraising, and personal customization.

Button Badge Press: The core component of the machine is a press that combines different elements to create a button badge. This press usually consists of a die set, upper platen, and lower platen.

Dies: Dies are interchangeable molds that determine the size and shape of the button badge. Different dies can be used to make badges of various sizes, such as standard 1-inch, 44 MM and 56 MM badges. The die set includes a top die and a bottom die.

Button Components: Button badges typically consist of several components, including a metal shell (front), a clear plastic cover (mylar), a paper or printed graphic, and a metal pinback. These components are assembled within the die set during the button-making process.

Customized Pin Badges; Pin them to your shirt, T-shirt or bag, and add that extra color and intrigue. These 44mm round badges can be customized by adding your photo, logo, image or text.

Customized Pin Badges: Pin them to your shirt, T-shirt or Bag and add that extra color and intrigue. These 55mm round badges can be customized by adding your photo, logo, image or text.

Dual Mug Heat Press Machine

A double mug heat press machine is a piece of equipment used in the field of sublimation printing and customization. It is specifically designed for applying heat transfer designs, patterns, or images onto ceramic or metal mugs. This type of machine allows you to press two mugs simultaneously, which can increase productivity for businesses that offer customized mugs or promotional items.

Dual Mug Capacity: As the name suggests, it can accommodate and press two mugs at the same time. This feature is beneficial for businesses looking to fulfill bulk orders efficiently.

Temperature and Time Control: Double mug heat press machines typically have digital temperature and time controls. This allows you to set precise parameters for heat transfer, ensuring the best results for your sublimation prints.

Pressure Adjustment: Some machines offer adjustable pressure settings, which is important for achieving even and consistent transfers onto mugs of different sizes and materials.

Co2 laser cutting machine

CO₂ Laser Cutting Machine – Cutting Machine Specialization

Power Options: 40W, 60W, 80W, 100W, 130W & 150W

Working Area: Available in multiple sizes according to production requirements

High Precision Cutting: Clean and accurate cutting with fine detailing

Engraving & Cutting: Supports both cutting and engraving applications

Suitable Materials: Acrylic, MDF, plywood, wood, leather, fabric, paper, rubber and more

Fast Processing: Designed for efficient production and repeat orders

Digital Control: Easy operation through compatible laser software

High-Quality Finish: Smooth edges and detailed engraving

Industrial & Commercial Use: Suitable for signage, gifting, décor, packaging, handicrafts and customized products

Low Material Waste: Precise laser movement helps optimize material usage

Reliable Performance: Suitable for both small businesses and regular production work

Customization: Ideal for name plates, acrylic letters, wedding décor, keychains, trophies, boxes and personalized products.
